Since 2021
Five Years of E7

5,000+ Installations

10M+ Patient exams

Vetus E7 Was A New Benchmark for Portable Ultrasound

3.5 kg

Industry's lightest portable ultrasound system

Triple-display design

Industry-first triple-display workflow

ZST+

Industry-first zone imaging technology in veterinary ultrasound

And Now, E7 Goes Ultra

What Makes Vetus E7 Ultra Truly "Ultra"?

It's *Ultra* in three dimensions:

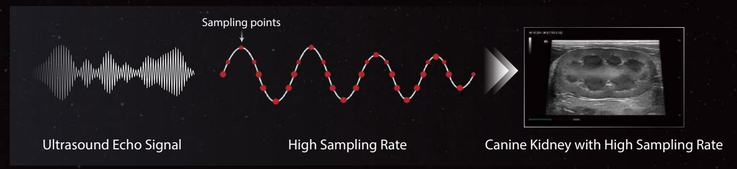

Ultra

Finer *Wider* *Further*

Finer

New Technology
Higher Sampling Rate NEW

A higher sampling rate provides a wider frequency range and better spatial resolution, delivering better image quality.

Ultra Image Quality

Wider

With four newly launched probes and advanced functions, we can have wider solutions.

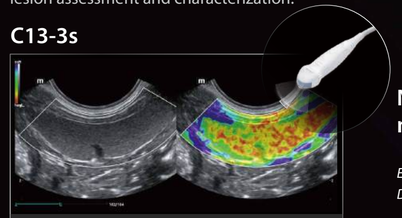

Brand-New

Oncology Solution

NTE (Natural Touch Elastography)

Assist in the evaluation of tumors and other pathological tissue stiffness variations for enhanced lesion assessment and characterization.

C13-3s

NTE of Canine Spleen

NTE available on micro convex probe NEW

Expanding Veterinary Elastography to Diverse Applications

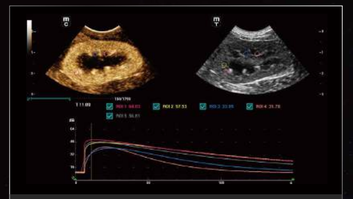

Available on convex & linear probes

UWN+ Contrast Imaging

Detect and utilize both the 2nd harmonic and non-linear fundamental signals, generating images to assist in the diagnosis of benign and malignant tumors.

CEUS of Canine Kidney

CEUS QA of Canine Kidney

Brand-New

Abdominal Solution

mSC6-1s NEW

Single Crystal Convex Probe

60kg Canine Liver

Deeper Penetration

Ergonomic handle design and superior footprint creates superior contact for larger animals

C13-3s NEW

Feline Liver Tumor

Superior near-field resolution and detail resolution

L14-3Ws NEW

Canine Adrenal Gland

Ultra-high detail resolution of tissue structure

Brand-New

Exotic, Musculoskeletal & Ophthamology Solution

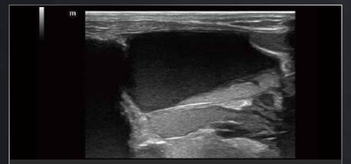

One customizable button with over 20 functions

L24-6Hs NEW

Hockey-stick Probe

Excellent Detail Resolution

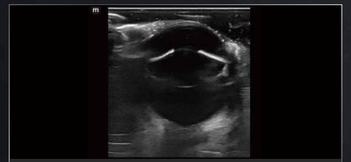

Compact design for flexible scanning

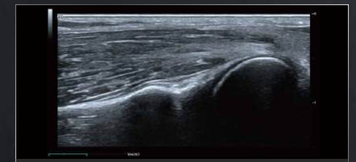

Guinea Pig Bladder

Lizard Liver

Canine Ocular

Canine MSK

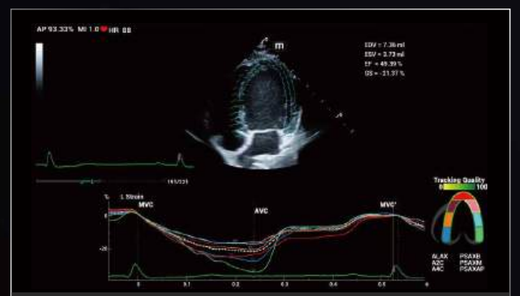

Upgraded

Cardiology Solution

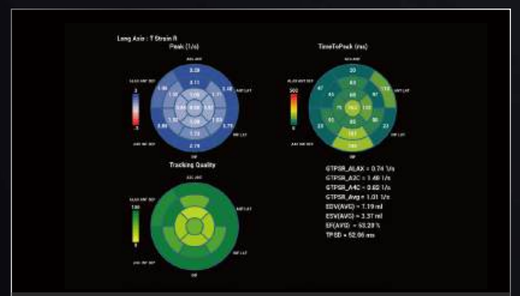

New Automated TTQA Workow NEW

Automated measurement significantly reduces veterinarians' operation time and improves work efficiency.

Auto-identify long-axis view (ALAX, A4C, A2C) → Auto-identify optimal cardiac cycle → Auto-locate MVC (ED) frame → Auto-trace the LV endocardium

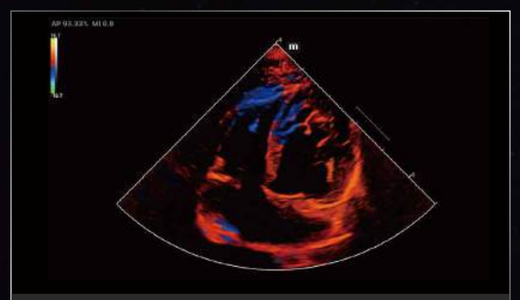

TTQA of Canine Cardiac

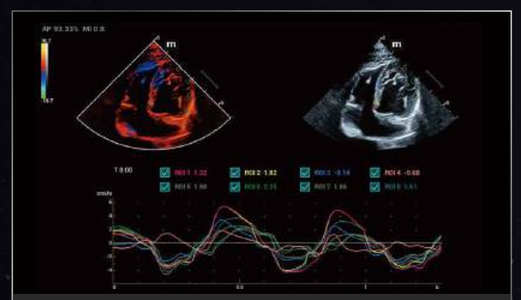

Bull`s Eye

TDI (Tissue Doppler Imaging) & TDI QA

Four complete TDI imaging modes: TVI/TEI/TVD/TVM, offering more comprehensive myocardial motion analysis.

TVI of Feline Cardiac

TDI QA of Feline Cardiac

Further

Go further with connected expertise and seamless image sharing.

iConnect NEW

Connect anytime, expert support anywhere.

Easy Share NEW

Convenient image sharing.
